

Scalability & Future Plan

Date	04 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Supports only a limited number of applicant features.	May reduce prediction accuracy for complex cases.	High
2	Handles only single-user requests efficiently	Performance may decrease with many concurrent users.	Medium
3	No user authentication and role-based access.	Security and access control are limited.	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited users.	Deploy on cloud infrastructure with load balancing.
2	Data Storage	Uses a basic local dataset.	Integrate a cloud database such as PostgreSQL or MongoDB.
3	Performance	Single ML model prediction.	Optimize the model and enable faster inference with caching.
4	Security	Basic application security.	Add user authentication, HTTPS, and secure API access.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2	Add user login and application history.	2 Month	Improved security and user experience.
Phase 3	Deploy on cloud with database integration.	3 Months	Better scalability and reliability.
Phase 4	Integrate Explainable AI (XAI) and real-time analytics dashboard.	Future Release	Increased transparency and better decision support.
