

No. of Functional Features Included in the Solution

Date	04 July 2026
Team ID	SWTID-2026-7391
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Login	Allows users to securely access the application.	Authentication	Done	High
2	Credit Card Application Form	Collects customer details such as income, employment, age, and financial information.	User Interface	Done	High
	Data Preprocessing	Cleans and prepares customer data before prediction.	Data Processing	Done	³ High
4	Credit Card Approval Prediction	Uses the trained Machine Learning model to predict whether the application is approved or rejected.	ML Model	Done	High
5	Prediction Result Display	Displays the approval or rejection result to the user.	User Interface	Done	Medium
6	Model Integration	Integrates the trained ML model with the Flask application.	Backend	Done	Medium
7	Input Validation	Validates user input before processing the prediction.	Validation Module	Done	Medium
8	Error Handling	Handles invalid inputs and unexpected application errors gracefully.	Backend	Done	Medium

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	User Login, Application Form, Data Preprocessing, ML Prediction

Additional / Nice-to-Have Features	Input Validation, Error Handling, Model Integration, User-Friendly Interface
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Login, Credit Card Application Form
2	Backend / Logic	3	Data Preprocessing, Prediction Engine, Error Handling
3	Database / Storage	1	Customer Dataset / Model Storage
4	API / Integration	1	Flask Integration with ML Model
5	Security / Authentication	1	User Login Authentication
