

Brainstorming & Idea Prioritization Template

Date	04 JULY 2026
Team ID	SWTID-2026-7391
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	R.Rahul	Compare classification models like Logistic Regression, Random Forest XGBoost to evaluate accuracy scales	Machine Learning Model	1
2	S.Megha Sai Sreeram	Perform exploratory data analysis(EDA) using matplotlib and seaborn graphs to track distribution dependencies.	Data Visualization	2
3	P.Yaswanth	Handle dataset anomalies, row structural missing elements, and encode text categorical to numerical arrays	Data Preprocessing	3
4	T.Ushasree	Design a responsive and user-friendly web application frontend panel interface using flask layout components	Web Development	4
5	M.Lakshmi Chaithanya	Configure the trained machine learning pipeline setup onto IBM watson studio for real-time cloud inference scoring.	Cloud Deployment	5
6				

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	ML Model evaluation & selection(Rahul's Idea)	High	High	1	Yes
2	Data exploration preprocessing & Feature Engineering(Sreeram & Yaswanth Ideas)	High	High	2	Yes
3	Flask Web Application & Cloud Deployment(Ushasree & Lakshmi Idea's)	Medium	High	3	Yes
