

Solution Architecture

Date	04 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>Presentation Layer</i>	<i>Provides the user interface for entering credit card application details and displaying prediction results.</i>	HTML, CSS, Bootstrap
API Gate/Server	Receives user requests, communicates with the backend, and sends prediction results to the user.	Flask
Core Logic Service	Processes customer data, performs preprocessing, runs the Machine Learning model, and predicts credit card approval.	Python, Scikit-learn, Pandas, NumPy
Data Layer	Stores customer information, datasets, trained ML models, and prediction results.	CSV Dataset, Joblib, SQLite
